August 10, 1931

Dear Brother,

This morning's Tribune says that Menocal and Mendieala have surrendered and that the revolution is over; which of course we hope is true.

But really I can not at all understand how a man that occupied the position both commercially and politically that he did when we were there; can now find himself in the position that the newspapers assert him to be.

We are absolutely without any intimation as to what has caused this revolution and would certainly appreciate it if you would write us and give us the high points pertaining thereto. I wrote you last Thursday and sent it by air mail; but possibly because of the mixup, you may have not received it or possibly may never receive it; so will try again and see if we can get in communication both to you and from you.

Think you had better leave that poor old stranded wreck and get back to Chicago; which, with all of its failings, Capone's booze included, seems to me to be a considerably better place to live than the "Pearl of the Antilles" with its continued recurrent upheavals.

Please let us hear from you real soon.

Sincerely
Clarence W. Crosby
