*Am holding  
family here  
funding a  
real clean up  
of Cuban mess  
situation*

I have just returned from town with the morning paper, containing articles re yesterday's bloody conflict in Havana. Am clipping this and enclosing to you; together with some others of recent and earlier date.

I am doing this because you said in a recent letter that you supposed that we had more real information here as to what was going on there, than you had. This may be true, for I saw something a few days ago to the effect that all news publications were off in Havana.

Of course you know that I do not place too much dependence in any news paper stuff, as one can never tell how much propoganda effort and money is behind it. I am only sending you these clippings to let you see just how the situation looks to us, in the absense of more definite information.

I do not fear in your behalf, on account of that portion of the conflict which is merely a Cuban political quarrel. I am well aware that the more visible and tangible factors are of purely political nature, now; just as it was when I was there in in the 1917 troubles.

But there is now in this present strife, a hidden--or partly hidden under-current of something which is infinitely more deadly--and that is Communism. You must not think that comunizm of today (which is the anarchy of a few years ago) is headed and manned by a small bunch of crazy fools; tho it still bears at times the red flag; and retains all of it former hideousness. It has become a powerful world wide organization; and has obtained a tremendous hold in all our colleges. The Chicago University is full of it. It strikes at the very root of the home life. It demands that its adherents shall shake their fist toward Heaven and defy God. It destroys all rightful sex relationship between one man and one woman, and makes them to become absolutely promiscuous like beasts, and then takes the resultant offspring into one common herding place and raises them like beasts--boys and girls together.

You say that you cannot believe that civilized and educated men and women can come to such a place. I tell you that have already come to this in Russia; and that they are fast getting it into the U. S., and into the very highest places in America. I have no fear that will ever predominate here as it is doing in Russia and other countries of non-Israelitish blood; but you may rest assured that it carries with it a most deadly hatred of everything and everybody that is Anglo-Saxon in principal and in fact. It is the final heading up of the iniquity of thoses Cannanitish races that God told Jansua to destry, and he failed to do; and who have been just what God said that they would be--"a thorn in Israel's flesh forever. The great Armageddon war itself is the final adjustment of that old score; and these rumblings in various quarters, are on the begining of the terrible finals.

I trust that you will see the utter folly in staying there any longer at this time "Jesus Himself said "The night cometh when no man can work" That night has come now. We can only get our armour on and go out and fight the unfinished battles that have been left over to us from our evry ancient fore-fathers.

Nell has gone on--suppose she is arriving at George's today. Al<sup>z</sup> are well here, and praying much for you.

Love and prayers,

*Clarence W Crosby*
